

# MSM 100%

MSM 100% Joint Mobility and Protection Supplement is a naturally formulated compound that is used to aid the treatment of knocks and bumps, returning normal joint mobility. It is also an excellent source of sulphur for the body.

Methylsulfonylmethane (MSM), the key constituent of MSM 100%, has been used and recommended for years by veterinarians. MSM, a metabolite of DMSO can be utilised in the formation of disulfide bonds in the skin and connective tissue (ligaments, mucosal membranes etc.) as the active component in free radical scavenger enzymes.

MSM helps build the cross-bridges/links between collagen molecules. These increase the tensile strength of collagen-rich tissues. MSM 100% can help shorten recovery periods between intense exercise

## Presentation

White powder in container with re-sealable bag with measuring scoop.

## Feeding Recommendations (for an adult horse 500kg)

Feed 10-30g daily as required  
(1 scoop contains 10g)

## Days Supply\* (Maintenance)

1.5kg - 50 days
