

AnxiKalm

AnxiKalm Compete is a nutritional powdered supplement to help calm excitable horses in stressful conditions.

Safe to use in competition horses and ponies, the key ingredients of AnxiKalm Compete are L-Tryptophan, B Vitamins and Magnesium.

- **L-Tryptophan**, this is an amino acid that is converted to serotonin in the body, and when combined with B Vitamins it is known to decrease anxiety and reduce the feelings that create stress.
- **Magnesium** is a key component for ensuring the integrity of nerve endings and the health of the mucus membranes that are key to an individual horse's level of sensitivity. Levels of magnesium can be depleted by stress and anxiety and so need to be replenished.
- **Tryptophan** does not sedate (which can be a good thing). It does not affect performance. Anxikalm is most effective on anxious/stressed horse or ponies to reduce a "fight or flight response" than "fresh" horses. Some horses react more to Magnesium supplementation, others to Tryptophan. AnxiKalm Complete contains both.

Presentation

Powder in container with re-sealable bag with measuring scoop

Feeding Recommendations (for an adult horse 500kg)

Administration : Give 1 scoop daily

Days Supply*

1.2kg - 40 days
3kg - 100 days

Anxikalm Triple Strength Gel 30ml

The most powerful and concentrated L-Tryptophan syringe on the market. The unique gel formulation ensures a fast rate of absorption, so the active ingredients get to work rapidly. Can be used in stressful situations such as competition and transportation.

30ml Syringe Supplies

L-Tryptophan (Amino Acid) 3810mg
B-Complex Vitamins: Thiamine 73mg,
Niacin 25mg, Pyridoxine 2.5mg

Feeding Recommendations

Give 30ml (1 Syringe) 2 – 3 hours before stressful activity. Amount given can be tailored to specific needs
